Professional Summary

Frontend Developer with 1.6 years of experience building responsive web apps using React.js, Tailwind CSS, and JavaScript. Currently expanding skills in full-stack development with Node.js, Express, and MongoDB. Focused on end-to-end application development and actively building personal projects to deepen backend development skills.

Work Experience

Novagito AI Pvt Ltd

Frontend Developer | July 2024 – April 2025

- Engineered and launched 3+ responsive web applications, improving average page load speed by 30% and reducing bounce rates.
- Delivered 5+ e-commerce features, including real-time previews, drag-and-drop customization, and secure checkout flows for platforms like Medisys and Dhruvvari, enhancing conversion experience.
- Integrated 10+ RESTful API endpoints using Axios to support live order tracking, real-time product filtering, and category-level search.
- Translated 20+ Figma screens into responsive, pixel-perfect components using React.js and Tailwind CSS.
- Implemented carousels, product filters, and live product listing using React Slick, improving UI engagement by 25%.

Infotrix (Internship)

Frontend Developer | Oct 2023 – June 2024

- Designed 10+ mobile-friendly web pages using React.js, HTML, CSS, and Tailwind CSS.
- Collaborated with senior developers to convert Figma designs into clean UI with 100% responsiveness across devices.
- Integrated 8+ REST APIs for real-time data, boosting content update efficiency by 90%.
