Professional Summary

Frontend Developer with 1.6 years of experience building responsive web apps using React.js, Tailwind CSS, and JavaScript. Currently expanding skills in full-stack development with Node.js, Express, and MongoDB. Passionate about end-to-end application development and continuously building personal projects to strengthen backend capabilities.

Work Experience

Novagito AI Pvt Ltd

Frontend Developer | July 2024 – April 2025

- Developed and launched 3+ responsive web apps using React.js, JavaScript (ES6+), and Tailwind CSS, improving page load time by 30%.
- Delivered e-commerce features such as real-time previews, drag-and-drop customization, and secure checkout flows for platforms like Medisys and Dhruvvari.
- Integrated RESTful APIs using Axios to enable dynamic product filtering, search, and live order updates.
- Translated Figma designs into clean, scalable, and pixel-perfect reusable components.
- Implemented carousels, product filters, search functionalities, and dynamic listing and React Slick.
- Collaborated with backend teams on performance tuning, reducing API response errors by 40%.

Infotrix (Internship)

Frontend Developer | Oct 2023 – June 2024

- Developed responsive web pages using React.js, HTML, CSS, and Tailwind CSS.
- Collaborated with senior developers to build user interfaces aligned with Figma designs.
- Integrated RESTful APIs using Axios and handled dynamic data rendering.
- Worked on features like search filters, product listings, and login modals.
